EDUCATION

Kenyatta University

Nairobi, Kenya

- BSc Computer Science
- AIESEC, IEEE, GDSC
- 2019-Present

Thika High-School

Thika, Kenya

2015-2018.
Handball, Computer club, Red Cross
Grade: B+

PROFESSIONAL EXPERIENCE

Imall64. Nairobi, Kenya

- *Website management and content management.* July 2022-January 2023

At Imall, I was tasked with updating goods on their WordPress CMS backend and integrating new SMS APIs into the system.

Manyani Delight Escapades

Nairobi, Kenya

- *Web development and graphic design.* 2021-July 2022
 - At Manyani, I was tasked with developing and maintaining the company's website and designing graphics on a need basis.

AIESEC

Nairobi, Kenya

- *Team Leader*
- *Vice President Brand and Customer Experience.* 2021-present
 - At AIESEC, I lead a team of individuals in the branding and marketing department and the digital engagement part of business development for AIESEC in Kenya.
 - I also manage the leads database and collect new data on potential Exchange participants (EPs).

EMK Associates {emkassociates.co.ke}

Nairobi, Kenya

- *Web development and tech support* 2023
 - I built a fully responsive website at EMK Associates accounting and auditing firm. I set it up for hosting configuring all settings for public view, and integrating emailing systems for the firm. Here I used my knowledge in HTML, javascript and Bootstrap CSS framework to achieve the goal. PHP was also integrated to facilitate receiving of emails from the contact form.

Titans Solutions. Nairobi, Kenya

- *Software development* 2023

At Titans solutions a group of friends and I came together to develop scalable tech solutions addressing business and personal challenges out there. Some of the solutions we have worked on include a smart health system, an offline ERP system, Express checkout shopping software and a school management system using the latest technology in communication APIs and payments and banking APIs.

Taka Points. Nairobi, Kenya

- *Web development and IoT(co-founder)* 2023
 - At Taka Points, we are building smart bins to incentivize waste disposal through points redeemable to airtime and reduce the impact pollution has on the environment. Leveraging 2G technology(USSD) and IoT, we have built a scalable solution to the pollution menace in major cities.
